

Frankfurt am Main, 12.02.2024

Dear Dr. Chris Chambers,

We are thankful to you and to our reviewer Pat Savage for the opportunity to make our manuscript as clear as possible.

Indeed, we were referring to our SESOI of $d_z = .5$ and $.1$ in raw MM1 values interchangeably in Table 1, and we agree that was confusing. We have made the equivalence of values clear in Table 1. We have also clarified this in section 1.3.1 of the analysis plan (line 227, added: "in raw MM1 values").

We look forward to hearing from you.

Sincerely,

Camila Bruder,

(on behalf of all authors)
