

Dear Barnabas, Dear authors,

Thank you very much for your response and explanations. I've read the paper and reviewed the supplementary files. I can state that my major concerns have been successfully addressed. The paper is now more clear and easier to follow and, importantly, its transparency has been increased. Great job!

I'd like you to clarify one more thing – what will be the (ultimate) output of the multiverse analysis? I think it's important to have this included in Stage 1, so could you please add this information into the RR?

A minor note – I've noticed a few typos scattered throughout the text (e.g., space missing between words, “section:s”, etc.). Please take a look at that.

Thank you.

All the best,

Matus Adamkovic
